

WIRELESS ADAPTER SETUP

- 1.** Open the WirelessSetup.html file (attached) with Notepad or free program Notepad++:
<http://notepad-plus-plus.org/>
- 2.** Change line 58 to be your SSID.
- 3.** Change line 65 to be your password.
- 4.** If you are not using WPA2 then you need to change line 76.
(WPA2 is the standard so you should not have to change this)
- 5.** Save your edited file.
- 6.** Take the SD card out of your MP70/700.
- 7.** Copy the WirelessSetup.html file onto the SD card into the Html Directory.
- 8.** Put the card back into the MP70/700.
- 9.** Use the remote control and hit the Menu key.
- 10.** Hit the Enter key to use the File Browser.
- 11.** Use the down arrow to go to the Html Directory.
- 12.** Use the arrow keys to find the WirelessSetup.html program and hit Enter.
- 13.** When it is done, you should have wireless.
- 14.** Hit Menu until you get to the Main page.
- 15.** Arrow down to Information page, check the right hand column – you should see bars under the wireless signal strength & addresses, under Wireless Connection.
